

Time period	Amount of funding received	Amount spent	How the money has been spent	Effect on pupils' PE and sport participation and attainment	How we will make sure/have made sure the improvements are sustainable
March 2017 - April 2018	£11,445 + £4085 surplus from 16/17	£3420	<p>The money has been spent on a sports coach from Steps2Sport who supports in PE lessons 1 afternoon a week.</p> <p>The coach has primarily supported NQT's in order to improve their subject knowledge and confidence. The CT's teach the lesson with the sports coach supporting the delivery and providing ideas and expertise for future lessons.</p>	<p>Children have increased participation as they want to take part in PE lessons as they are more challenging and suited to their abilities. They also have increased attainment as they make clear progress through the unit.</p>	<p>These improvements will be sustainable as the staff are more confident in the future at planning lessons with clear progression.</p>
			<p>The sports coach has also continued to run after-school clubs. These are paid for in part by the parents and in part by sports premium.</p>	<p>We have already seen a huge increase in participation, with waiting lists for clubs, and anticipate that this will continue.</p>	<p>As this is paid for in part by the parents, this will be sustainable in the future as they are already used to paying.</p>
		<p>£2200 + £300 for coaches to extra swimming</p>	<p>Central School Sports Partnership. This entitles us to:-</p> <p>Access to Top Up swimming. We can select up to 15 pupils in year 5 or 15 pupils in year 2 who are unable to swim 25m (or require extra support) for a 4 week intensive swimming block over the course of 4 weeks.</p> <p>Membership to the Youth Sport Trust: This provides us with additional resources and CPD courses, all of which are coordinated through the School Games Organiser (SGO). Courses include Active Literacy and Active Numeracy plus several other relevant courses.</p> <p>Play Leader Programme: Opportunity to send 12 pupils in</p>	<p>15 year 5 children went for these extra sessions and so are now able to swim much more confidently. They still have their NC time in the summer term and so should be able to swim 25m by the end of year 6.</p> <p>These courses provide training and therefore further expertise to our staff in their delivery of PE.</p> <p>This has had a huge impact on the children who are leaders and their engagement, as</p>	<p>This would not be sustainable without the extra funding.</p> <p>The expertise which the staff have obtained will be sustained and passed on to other staff.</p> <p>Now we have the resources, we could train the</p>

		<p>years 5/6 to train to become play leaders.</p>	<p>well as that of the children they are encouraging to play games at break and lunchtimes. This is a quote from our recent Ofsted report:</p> <p><i>'Breaktimes are fun. Pupils play happily together. If they do fall out, there is always someone on hand to help sort things out. This includes the Year 5 'play leaders' who are worthy ambassadors of the school's values. They make a big contribution to pupils' enjoyment of playtime.'</i></p>	<p>children internally if the need arose in order to continue the program.</p>
		<p>Year 1 and Year 2 Multiskills Festival -This competition enabled us to send all of our pupils in year 1 and 2 over 2 days.</p>	<p>The children loved this competition and it was an opportunity for the year groups who do not usually get the chance to compete.</p>	<p>We could potentially organise something like this in our school and invite others to it, but it would not be possible for it to be on such a large scale.</p>
£1560		<p>Bearwood Creek Adventure Centre - We have begun to take all of Year 5 here for a day so that they are able to experience outdoor activities which is part of the NC requirement. The Sports Premium money means that we are able to subsidise the day and so the children can pay £10 for an experience which should cost £25.</p>	<p>This means that all of the children are given the opportunity to experience outdoor activities which they do not normally have the chance to experience. They can then be inspired to carry these on outside of school now or in the future. It also has massive benefit in drawing out teamwork, confidence and perseverance in</p>	<p>As the children contribute to the payment, we could still afford part of the experience if the funding was no longer available. It is now ingrained in the school calendar and so the trip would continue.</p>

				the children as they experience new things.	
		£378	Supply cover for PE coordinator to enable attendance at 2 training sessions and to run an internal competition	The internal skipping competition saw all 240 KS2 children participate in competitive sport which allowed them to explore the competitive side of their nature. A side effect has been increased activity at break and lunch times as children taught themselves to skip and now skip for pleasure as well.	The competitions could still run but less frequently as the PE coordinators class would still need to be covered.
				The other course was a teaching and learning games course. This has increased the PE coordinator's knowledge and understanding in this area and CPD will be carried out for the rest of the staff team in order to improve the children's experience of games lessons.	The knowledge and understanding will be transferred into planning and so even if staff move on, their expertise will remain through their planning.
				One of the courses was a PE coordinator day run by Hannah Reed and this will have knock on effects in terms of the children's access to different sports and the way in which we spend the sports premium for facilitating the children's activity levels.	When implemented, the activities will be sustainable as they will be run by the children.
		£30.00	Contribution to the Greet Mini-League for medals and certificates.	This has always been a popular part of our school sports calendar, with upwards of 20 children trying	We have always entered the Greet football league and so this will continue to

				out for the team each year. It is something the school can unite around as scores are announced and the team celebrated.	be a priority regardless of funding.
		£1425	Playground barriers	These can be used to separate off parts of the playground so that more organised games can take place at break and lunch times. So far, we have seen an increase in engagement in trials for different sports teams with the rest of the children more readily able to watch safely. This in turn, encourages others to join in. Following some training to be given by the PE coordinator, the Playleaders will also be able to use the barriers to run small games themselves during lunchtime.	We bought plastic barriers so that they will last a long time.
		£185	As we are attending more competitions this term, coaches and taxis to these will also be paid for from the sports premium.	We have already seen a huge increase in pupil engagement and participation, with 25 trying out for the football team, 30 for the netball team, and over 100 trying out for the 2 cricket teams.	We will continue to enter competitions, as entering and being competitive raises our children's standards as they are being challenged.
		£25	Motor skills book	This will allow the SENCO to recommend sports related activities to improve children with SEN's motor skills - both fine and gross.	Once teachers are aware of ways of using sport to do this, it will become imbedded in their practice.
		£70	Swimming teaching course and teaching of games course	This has increased the PE coordinator's and another staff	The knowledge and understanding will

				members knowledge and understanding in these areas and CPD will be carried out for the rest of the staff team in order to improve the children's experience of swimming and games lessons.	be transferred into planning and so even if staff move on, their expertise will remain through their planning.

Balance c/f to 17/18 - £5937

Time period	Amount of funding received	Amount spent	How the money will be spent	Effect on pupils' PE and sport participation and attainment	How we will make sure/have made sure the improvements are sustainable
	£5937 (c/f)	£848	A 2 week swimming course for children in year 6. 30 children will go for one week and 30 children for the other week.	This will increase our numbers of children being able to swim 25metres before they leave primary school.	This would not be sustainable without the Sports Premium.
		£360	A trip to Edgbaston Cricket Ground for all 60 year 5 children to increase their engagement in sport.	This will really engage our youngsters, particularly as our year 5s have a massive interest in cricket and it will allow them an experience that otherwise most of them would never have.	This would not be sustainable without the Sports Premium unless we asked parents to pay for the trip.
		£200	Transport to each of the above.		
		£2000	Support for chn to attend the Year 6 residential	This means that more children are able to go on the residential and experience Outdoor Adventurous Activities.	Without the Sports Premium, we would have to seek funding from elsewhere to continue to subsidise the children's places.
		£2529	To be decided after Easter.		

Number and percentage of Year 6 children who can swim 25metres, as of March 2018:-

15/60 or 25%.
